OBJECTIVE

I'm not just a developer - I'm a digital problem solver. From crafting pixel - perfect UI's to building scalable API's, I bring ideas to life through code.

With 4 years of successfully developing interactive web applications with responsiveness, leveraging cutting-edge technologies and mentoring junior developers, I have significantly improved organizational scalability, user experience and UI/UX design, culminating in user satisfaction, product efficiency, and improvement of client-side scripts.

Skilled in Angular, HTML, JS, Typescript, Ngnix, Winscp and CSS, I am confident in my ability to bring valuable expertise and innovative solutions to any position.

SKILLS

- Angular and Type script
- SQL (Medium)
- Jenkins (Basic)
- SVN and Winscp (Medium)
- Ngnix
- C and C++ (Medium)
- GitHub
- Insomnia and Postman tool

PROJECTS

HDFC Life Insurance : Front-End Developer (Angular) | HDFC Customer Portal - MY ACCOUNT REVAMP PORTAL.

Started career as frontend developer in HDFC Life Insurance customer portal. Making responsive and user interaction single page application with Agile process.

Roles and Responsibilities:

Responsible for full SDLC of end-customer facing Angular application which is used by millions of life insurance policy holders.

Leveraged Angular 13, HTML5, Angular Material Components, RxJS frameworks to implement responsive modern user experiences.

Implemented several custom directives and pipes to promote code reuse and readability. Used pdfjs package to generate pdf files of web pages. Instrumental in Angular version upgrades and build issues.

Integrated Google and Adobe analytics scripts to enable website usage analytics. Utilized Jenkins for repeatable and predictable deployments and Checkmarx tool for static analysis of InfoSec vulnerabilities.

Configured path rewrites, path forwarding, response headers in Nginx web server. Collaborated with multiple vendor, application and support teams to deliver seamless value to customer. Integration of customer portal with mobile app through single sign on process.

Tech stack : Angular(11,13&16),Typescript,HTML5,Spring Boot,Oracle DB,Winscp& Jenkins.

Dynamic Pricing Project

Senior Web Developer (Angular) | FedEx – Dynamic Pricing Platform

Roles and Responsibilities:

Built responsive, dynamic UIs in Angular for FedEx's real-time pricing portal,

enabling business users to configure, preview, and monitor dynamic shipping rates, discount adjustment and customer level charges across regions and services.

Integrated RESTful APIs with Angular to display dynamic pricing data, shipping rules, and simulation outputs in real-time. Collaborated with backend teams to support and optimize Spring Boot microservices handling pricing logic, rule configurations, and authentication.

Developed reusable UI components (modals, charts, tables) for pricing simulations and rule management, improving development speed and consistency across the platform.

Enhanced performance and user experience by lazy-loading Angular modules and optimizing API call patterns.

Tech stack: Angular 11 and 12, TypeScript, HTML5, SCSS, Spring Boot, REST APIs, Git, Jenkins, Insomnia, Postman.

ACHIEVEMENTS & AWARDS

Won 2nd and 3rd prize in "TECHNICAL CONNECTION AND CODE CRACKING"event and cash prize of Rs. 5000 @St.joseph's college of engineering.

National level "Technical Quiz" - 1st place @ SA Engineering college.

DECLARATION

I hereby declare that the above mentioned details are true and clear to the best of my knowledge.
